SUMMARY

Full Stack Developer with experience building and maintaining 3 production CRM portals for a multi-tenant SaaS product using React, Next.js, TypeScript, Node.js, Express, and REST APIs. Skilled in responsive UI development, API integration, RBAC, databases, and AWS deployment.

PROFESSIONAL EXPERIENCE

Soft7 Technologies 🌐, Full Stack Developer 02/2026 – Present | Remote

- Engineered 10+ responsive UI modules in React, Next.js, and TypeScript (dashboard cards, filters, modals, data tables, export actions), establishing reusable component patterns that sped up delivery of new admin screens.
- Built and maintained core frontend workflows across 3 production CRM portals (Admin, Super Admin, User Dashboard) — dashboards, user management, company management, subscriptions, support tickets, notifications, and profile screens.
- Implemented RBAC authentication and session security across all portals, including login flows, suspended-user blocking, token/session handling, and real-time user-status validation on both frontend and API layers.
- Integrated 6+ REST API workflows (company creation/editing, subscriptions, contact/inbox, dashboard data) using Axios, FormData, and structured validation/error handling, reducing malformed-request failures reaching production.
- Refactored large pages into reusable hooks, components, and shared TypeScript types, cutting duplicate code and shortening onboarding time for teammates working in the same modules.
- Added server-side search and filtering for large datasets and resolved production bugs, build errors, UI regressions, merge conflicts, and API integration issues.

SKILLS

Frontend: Next.js, React.js, HTML5, CSS3

Backend Technologies: Node.js, Express.js, RESTful APIs

Databases: MySQL, MongoDB, PostgreSQL, Sequelize ORM, Mongoose ODM, Prisma

Authentication & Security: JWT, Bcrypt, Role-Based Access Control

DevOps & Cloud: AWS (EC2, S3, RDS), Jenkins (CI/CD), Nginx, PM2

Tools: Git, GitHub, Postman, Cron Jobs, Cashfree, Razorpay

Programming Languages: JavaScript (ES6+), TypeScript

Development Practices: CRUD Operations, API Design, Request Validation, Error Handling, Agile Methodologies

Computer Science Fundamentals: Data Structures and Algorithms

PROJECTS

EXPENSE TRACKER 🌐, Finance Application

Node.js/Express/MySQL backend for expense tracking with premium-tier gating; integrated Cashfree payments and S3-stored downloadable reports; deployed on AWS EC2/RDS with Nginx + Jenkins CI/CD.

CHAT APPLICATION 🌐, Real-Time Messaging System

Socket.io/Websockets backend for multi-user and group messaging with moderation controls; automated message archiving via Cron jobs.

KINDKART 🌐, Charity Donation Platform

Node.js/Express/Sequelize/MySQL backend for donation and campaign management; integrated Razorpay with webhook verification; built file-upload workflows for campaign assets.

EDUCATION

Bachelor of Science, Mahatma Gandhi University

08/2019 – 05/2022
