PROFESSIONAL EXPERIENCE

Soft7 Technologies, Full Stack Developer 02/2026 – Present | Remote

- Built and maintained core frontend workflows across 3 production CRM portals (Admin, Super Admin, User Dashboard), dashboards, user management, subscriptions, support tickets, and notifications, using React, Next.js, and TypeScript, as part of an 8-person engineering team.
- Engineered 10+ reusable UI modules (data tables, filters, modals, export actions), establishing component patterns that sped up delivery of new admin screens for the team.
- Implemented RBAC authentication and session security across all portals, login flows, suspended-user blocking, and real-time status validation, using JWT on both frontend and API layers.
- Integrated 6+ REST API workflows (company management, subscriptions, inbox, dashboard data) using Axios with structured request validation before submission to the API layer.
- Built webhook-driven integrations with Meta/WhatsApp messaging APIs to support scalable lead broadcasting and a custom AI chatbot flow, improving customer interaction and lead-handling capacity within a Dockerized Node.js/PostgreSQL production environment.

PROJECTS

EXPENSE TRACKER, Finance Application

- Built a full-stack expense management app using React, TypeScript, Node.js, Express, MySQL, and Sequelize with JWT authentication.
- Implemented expense management, search/filtering, pagination, analytics, CSV export, and Cashfree premium subscriptions.
- Deployed on AWS EC2 with static assets served via S3.

CHAT APPLICATION, Real-Time Messaging System

- Built a real-time group messaging application using Node.js, Express, MySQL, Sequelize, and WebSocket based real-time communication (Socket.io).
- Added group management, admin controls, file sharing, and automated message archiving with Cron jobs.

KINDKART, Donation Platform

- Built a charity platform using Node.js, Express, Sequelize, and MySQL for campaign and donation management.
- Integrated Razorpay payments via webhook-driven event verification, with campaign file uploads.

SKILLS

Frontend: Next.js, React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3
Backend: Node.js, Express.js, RESTful API Design, WebSocket (Socket.io)
Databases: MySQL, MongoDB, PostgreSQL
Authentication & Security: JWT, Bcrypt, Role-Based Access Control (RBAC)
DevOps & Cloud: AWS (EC2, S3, RDS), Docker
Tools: Git, GitHub, Postman, Chrome DevTools, Cashfree, Razorpay
Foundations: Data Structures and Algorithms, CRUD Design, Error Handling, Agile Methodologies

EDUCATION

Mahatma Gandhi University, Bachelor of Science 08/2019 – 05/2022

TRAINING AND CERTIFICATIONS

Sharpener, Full-stack development program (MERN) 07/2024 – 11/2025
